PROFESSIONAL SUMMARY

UC Berkeley EECS graduate with 3+ years of experience designing and developing scalable, interactive applications and immersive user experiences. Skilled in full-stack development with hands-on experience across the full software development lifecycle from prototyping and system design to testing, deployment, and iterative improvement. Experienced in collaborating with design, product, and engineering teams to deliver polished, user-focused solutions. Passionate about creating engaging, safe, and inclusive digital environments for users.

EDUCATION

The University of California, Berkeley | **Degree:** Electrical Engineering and Computer Science | August 2021- May 2025

SKILLS

Programming Languages: JavaScript, TypeScript, Node.js, Python, Java, C++, HTML, CSS, SQL, XML, R

Design skills: Figma, Human-Centered Design, Wireframing, Prototyping, Adobe Illustrator, Photoshop, Design Systems

Concepts & Tools: Object-Oriented Programming, Algorithms & Data Structures, Git, REST APIs, Firebase, Version Control, TypeScript, Responsive Design, Tailwind CSS, React

Soft Skills & Other: Bilingual: English/Spanish, Technical Mentoring, Curriculum Design, Leadership

TECHNICAL PROJECTS

Client Web Developer, ARP Hardscape Inc. | 2024 – Present

Prototyped in **Figma** and developed a responsive company website using **React**, **TypeScript**, **Tailwind CSS**, and **Formspree** to streamline client inquiries. Configured a custom domain, optimized UI/UX for brand alignment, and continue to iterate with **new features and performance enhancements** based on client feedback.

Live site: arphardscape.com | Code: github.com/Sssamanthaaa/ARP-Hardscape

Personal Website

Designed, built, and deployed a personal portfolio site using **React** and **GitHub Pages** to showcase technical and UX work. Applied **human-centered design** principles from UC Berkeley coursework to wireframe and prototype in Figma. Conducted extensive manual testing to ensure cross-browser compatibility, responsive layout, and accessibility.

Live site: sssamanthaaa.github.io/my-website/ | Code: github.com/Sssamanthaaa/personal_website

Baybe on the Go

Planned and delivered an AI-powered document sorting tool for family travel planning. **Designed UX flows and high-fidelity Figma prototypes**, ran user testing, and refined features based on feedback. **Built with a development team** using React, Git, and Firebase for backend storage and authentication. **Launched an AI-based auto-categorization system** to streamline document organization.

Live site: sssamanthaaa.github.io/dashboard | Code: github.com/Sssamanthaaa/Baybe-on-the-go-Website

Stack Attack

Programmed and tested a 6-joint Sawyer robotic arm to detect and stack blocks into a stable pyramid using inverse kinematics and path planning. Delivered an interactive demo that showcased **real-time control systems** and **complex problem-solving under hardware constraints**.

Live site: tsg132.github.io/106final/ | Code: github.com/tsg132/eecs106a-final

Google Code Next Hackathon, 2nd Place Winner, Save H2O, 2019

Built a responsive web app with **JavaScript**, **HTML/CSS**, and the Glitch platform to promote environmental sustainability. Enabled users to find local clean-up sites and discover eco-friendly brands. Contributed to **frontend** design and data integration.

Live site: waiting-fuschia-polo.glitch.me | Code: glitch.com/edit/#!//waiting-fuschia-polo

EXPERIENCES

Berkeley National Laboratory | *Student Assistant* | Berkeley, CA | 2023 - Present

Developed interactive, STEM-based robotics curriculum for K–12 learners. Created **lesson flows** and hands-on projects designed to engage diverse student audiences. Used student and volunteer feedback to refine **instructional design** and materials. Led sessions on **data science fundamentals**, guiding students through projects involving data collection and visualization.

RoboBears | *President* | Berkeley, CA | 2021 - Present

Led UC Berkeley's combat robotics team, overseeing design fundamentals, fabrication, and national competition entries. Designed mechanical and electrical systems using **Fusion 360**, **CAD**, and **Arduino-based microcontrollers**.

IMentor Bay Area | *Mentee* | Oakland, CA | 2019 - Present

Worked one-on-one with a professional mentor to develop college and career readiness skills.

Google's Computer Science Summer Institute | *Student* | Virtual | 2021

Completed an intensive program focused on **Java programming**, **web development**, and collaborative team projects. Built and deployed full-stack web applications using **HTML**, **CSS**, **JavaScript**, and **Firebase**. Worked in diverse teams to design user-friendly applications and presented them to Google engineers.

Code Next Oakland by Google | *Member* | Oakland, CA | 2017 - 2021

Gained experience in **programming**, **UX design**, **web/app development**, **circuit design**, and **robotics**. Finalist in robotics competition with a self-navigating vehicle designed to complete obstacle challenges. Collaborated on web-based projects and explored real-world applications of tech through workshops and hackathons.
